EXPERIENCE

Front-end UX UI Designer, Unilever - Toronto (H3L AI Labs) December 2025 - Present

- Sole designer and design lead for Horizon 3 Labs, owning end-to-end UX/UI across multiple high-value AI agent products, from discovery and wireframing through high-fidelity prototypes and production-ready designs.
- Built and maintained the full UI component library and design system, establishing scalable design tokens, patterns, and documentation that ensure consistency across all platform surfaces.
- Led design consultations and stakeholder reviews for MVP launches, aligning cross-functional teams on interaction models, information architecture, and experience strategy for complex AI-driven dashboards and conversational interfaces.
- Contributed directly to front-end development by authoring component documentation in GitHub, creating coded reference files, and collaborating hands-on with engineering to bridge design-to-development handoff.

Lead Product Designer, Remitian - Remote (FinTech Start Up) February 2025 - October 2025

- Led end-to-end experience design for web and mobile tax-remittance products used by accounting firms and finance professionals.
- Mapped complex financial workflows and conducted interviews at conferences and demos to uncover user problems, compliance needs, and behavioural patterns.
- Created interaction models, high-fidelity prototypes, and motion-based microinteractions that improved clarity and user confidence in high-stakes financial tasks.
- Partnered closely with Engineering and Product to refine technical feasibility and maintain design quality across iterative releases.

UX/UI Designer, CustomsCity - Toronto June 2024 - February 2025

- Designed responsive dashboards and data-heavy workflows for international shipping, customs clearance, and compliance for enterprise users.
- Developed interactive prototypes and motion behaviors to communicate complex system states across web and mobile experiences.
- Collaborated with developers to ensure seamless execution and alignment between interaction models and technical constraints.
- Organized and maintained structured component libraries to support consistency across multiple product surfaces.

UX/UI Designer, Velocity Tech - Remote (SaaS Start Up) February 2024 - June 2024

- Designed dashboards, flows, and high-fidelity interfaces for a platform connecting engineers with companies hiring for specialized technical roles.
- Simplified dense ERP data through thoughtful visual hierarchy, interaction patterns, and accessible UI structures.
- Used prototyping tools and AI-assisted workflows to rapidly explore variations and validate concepts.
- Collaborated with cross-functional partners to balance technical feasibility with an engaging, intuitive digital experience.

PROJECTS

Lead Product Designer, Pagoda Yoga September 2024 - December 2024

- Designed the core onboarding and scheduling experience for a mobile wellness product, incorporating clear flows and cohesive visual patterns.
- Conducted usability testing and behavioral analysis that increased onboarding completion by 15%.
- Delivered motion-enhanced interaction patterns and scalable design components to accelerate engineering development.

EDUCATION

SpringBoard, San Francisco, CA UI/UX DESIGN POST GRAD CERTIFICATE
Brock University, St.Catharines, ON Bachelor of Business Administration, Major: Marketing

SKILLS

Research & Strategy: Discovery Research, Usability Testing, Data-Driven Design, Journey Mapping, UX Metrics
Accessibility: WCAG 2.2 Compliance, Inclusive Design, Visual Clarity, Interaction Consistency
Collaboration: Cross-Functional Workflows, Agile Environment, Stakeholder Facilitation, Design Sprints
AI & Emerging Tech: Agentic AI Exploration, Conversational Interfaces, LLM Tools (ChatGPT, Gemini), Adaptive UI Concepts
